

KNOW THE SIGNS OF **DIABETES** WITH SUGAR & SPIKE

Sugar & Spike want to help you keep your pet happy and healthy. So, we've compiled a checklist of signs of diabetes to look out for in your dog or cat.

Print this out to mark down which signs, if any, your pet exhibits and remember to bring it with you to your next veterinarian appointment.

1 **Urinates Frequently**

Your dog or cat wants to go outside more often. Your dog may urinate in the house; your cat may urinate outside of their litter box.

2 **Always Thirsty**

You have to fill the water bowl more often than before or notice your cat or dog drinking from unusual places, such as a toilet bowl.

3 **Always Hungry**

Your dog or cat never seems to get enough food – they're always begging for food.

4 **Losing Weight**

Although your dog or cat has a good appetite, they keep losing weight.

5 **Cloudy Eyes**

This sign is only present in dogs.

6 **Deteriorating Coat**

Fur can become dry or dull. Cats may stop grooming.

7 **Always Tired**

Your dog or cat used to be energetic, but now they sleep all day.
